What is a solar panel made of?

The frame of the solar panel is crafted from a 1.1~1.2mm aluminum alloy, which is 0.4mm thicker than that of competitors. It features 20 pre-drilled mounting holes on the back frame for quick and secure installation. The terminals of the charge controller are compatible with solar cables up to 8 AWG.

Which solar cables are compatible with the charge controller?

The terminals of the charge controller are compatible with solar cables up to 8 AWG. Connecting the cable to the controller is easy and quick, thanks to appropriate spacing and pre-stripped cables. You can use the temperature sensor to adjust the charging voltage based on battery temperature*.

Can solar panels be connected in series?

Solar panels can be connected in series or in parallel to meet your electrical circuit size and power demand. Connecting solar panels in series will have the effect of adding up their operating voltage output, while system current output will be the same as that for one panel.
