

180 watts solar panel price Jersey

How much does solar cost in New Jersey?

In New Jersey, solar costs about \$3.50 per watt, installed. For a 5 kW system, that's an average price of \$17,500. That's slightly below the national average. Is it worth going solar in New Jersey?

Are solar panels cost-effective in New Jersey?

Solar panels can cost a lot of money, but they may be more cost-effective than your usual electricity bill over the long run. You're not on your own when it comes to paying for solar in New Jersey. A combination of federal, state and local rebates can shave a significant portion of the cost off your project.

How much does a 5kw Solar System cost?

But here's one way to think about it: Let's say you install a 5kW solar system at the average cost of \$17,500. You take 30% off the cost using the federal tax credit, meaning your total project cost is effectively \$12,250.

Are solar panels a good investment in New Jersey?

In New Jersey, the average electricity bill was \$114 per month in 2022, according to data from the Energy Information Administration, or about \$1,368 per year (and rising). So, if your solar panels can cover some or all of your energy needs, you stand to save a significant chunk of money compared to utility electricity.

How much does a 4KW Solar System cost to install?

For the average 3-bedroom house in 2023, a fully installed 4KW (10 panel) solar system typically starts at around \$8,000. Keep in mind that additional costs may arise for safety measures like scaffolding or concurrent property work (roofing, painting, etc.).

Does New Jersey have a solar rebate?

A combination of federal, state and local rebates can shave a significant portion of the cost off your project. CNET recently graded states based on their solar incentives, and New Jersey received the only "A" grade. Solar owners in New Jersey can receive a full exemption from the state's sales tax for all solar energy equipment.
