

## 20 mw battery storage Cuba

NTPC has issued a request for qualification (RfQ) to select developers to set up 1,150 MW grid-connected solar power projects across 175 locations in Cuba. Also, a tender for 150 MW/150 MWh battery energy storage systems has been released for three locations in Cuba. Under the International Solar Alliance's Program-6, NTPC was appointed as the ...

1 This includes Front of the Meter (FTM) storage projects that are operating or have been announced in local press and documents. 2 There are active storage projects in Antigua, Barbuda, Saint Lucia and Turks & Caicos but their current capacities are not known.

NTPC has issued a request for qualification (RfQ) to select developers to set up 1,150 MW grid-connected solar power projects across 175 locations and 150 MW/150 MWh battery energy storage systems (BESS) at three locations in Cuba.

Caribbean Utilities Company, Ltd. (CUC) and technology group W&#228;rtsil&#228;; have signed an agreement, which will result in W&#228;rtsil&#228;; supplying two 10 megawatt (MW)/10 megawatt hour (MWh) energy storage systems to CUC.

State-owned power generator NTPC is seeking global bids on behalf of Uni&#243;n El&#233;ctrica de Cuba (UNE) for 1,150 MW of grid-connected solar PV and 150 MW/150 MWh battery energy storage system (BESS) projects in Cuba.

In recent development, Deltro has started working towards providing a total of 300MW of Energy Storage in Cuba. The first installment of the 300 Megawatts will be a total of 50MW divided evenly between the provinces of Guantanamo (25MW) and Pinar Del Rio (25MW).

ADFD further noted that the benefits from this project have encouraged it to support a second 14.3-MW solar scheme that will include 4 MW of battery storage capacity. It has allocated USD 20 million towards this project under the seventh cycle of ...

Consequently, today the peak demand is about 20 MW around 22:00 during a summer day, exceeding the demand for a winter day by 2 MW. In Isla de la Juventud, by the end of 2019, there was 15% of penetration by renewable energy into the electrical system, with a significant participation of PV (66.14% of RES) [ 27 ].
