

## 200 kwp solar Luxembourg

How many solar projects has Luxembourg selected?

Luxembourg has selected 75 solar projects in the nation's first procurement exercise for self-consumption. It will launch a second tender in July. From pv magazine France Luxembourg's Ministry of Economy and Ministry of Energy have chosen 85 projects totaling 43.3 MW in the country's inaugural solar self-consumption tender.

How much solar energy does Luxembourg use?

Today, solar energy makes up 13% of Luxembourg's energy consumption. To reach the renewable energy target of 25% by 2030, the Grand Duchy has introduced a string of incentives. The aim is to make efforts to protect the climate a profitable investment. How much is the subsidy?

Are solar panels a profitable investment in Luxembourg?

Luxembourg is ramping up its financial incentives and making the installation of solar panels a very profitable investment until 2025.

How much does electricity cost in Luxembourg?

For example, for an installation of up to 10 kWp completed in 2022, the Luxembourg government will buy back your electricity at the same rate for 15 years, i.e. 0.1506 per kW/h. As a quick comparison, in France, these prices are re-evaluated every quarter and are set at EUR 0.1493 per kW/h in October 2021.

When will Luxembourg launch a second solar tender?

The ministry plans to launch the second tender of this kind in July. As of the end of 2022, Luxembourg had approximately 319 MW of installed PV capacity, with around 42 MW of new solar additions last year, according to the International Renewable Energy Agency. How much does it cost to install a 7 kWp solar panel?

For example, a 7 kWp installation would cost between EUR 10,000 and EUR 14,000 to install. In this case, the PRIME House subsidy would amount to EUR 1,750 in the low range and EUR 2,300 in the high range. And remember that the PRIME House subsidies are extended until 31 December 2025 for the installation of solar panels.

Each solar module produces 400W, while the lightweight version produces 200W. A maximum of 2 standard solar panels or 4 lightweight modules can be installed, offering a total output of 800W (which corresponds to the power usage of several common household appliances.)

Lot 4, designated as "innovative," includes photovoltaic systems on building roofs with lightweight modules and modules on façades, divided into two sub-lots: Sub-lot 4a ...

## 200 kwp solar Luxembourg

Lot 4, designated as "innovative," includes photovoltaic systems on building roofs with lightweight modules and modules on façades, divided into two sub-lots: Sub-lot 4a for capacities greater than 200 kWp and up to 500 kWp, and Sub-lot 4b for capacities greater than 500 kWp and up to 3 MW.

SolarCells is the first producer of photovoltaic panels in Luxembourg, located in Hollerich. We manufacture high-quality panels using European components, certified with IEC standards, offering yields exceeding 400 Wc.

\*The kilowatt-peak (or kWp) is the unit of measurement used to assess the power attained by a solar panel when exposed to maximum solar radiation. For example, a 7 kWp installation would cost between EUR 10,000 and EUR 14,000 to install. In this case, the PRIME House subsidy would amount to EUR 1,750 in the low range and EUR 2,300 in the high ...

Reserved for photovoltaic power plants with an installed capacity of between 200 kWp and 5 MWp. The five lots are divided into three categories : Industrial land; Building exteriors; Canopies or water basins; To find out more. Call for projects to qualify for investment subsidy

With a capacity of 1,070 kWp and 2,675 PV modules, this new plant produces 1,170 MWh of green electricity, the equivalent of the annual electricity consumption of 370 four-person households. The installation is a joint-venture project between Minett-Kompost and SUDenergie.

Guaranteed feed-in tariff under the Klimabonus subsidy scheme (< 30 kWp) or without subsidy for installations < 200 kWp or < 500 kWp with cooperative agreement with the grid operator; Market premium based on a call for tenders for photovoltaic installations ranging from 200 kWp to 10 MWp from the grid operator
