

# 500kw wind turbine generator

What is a V39-500kW wind energy generator?

The V39-500kW WEG (Wind Energy Generator) is a superiorly designed three-blade turbine. High degree of robustness and efficiency is accomplished by effectively using a combination of a tubular tower, hydraulic pitching and blades.

What is a Vestas V39-500kW wind turbine?

RRB Energy offers highly efficient and superior Vestas V39-500kW large-sized wind turbine, which is ideal for powering wind energy projects of medium scale. The energy capture of this turbine is exceptional across a wide range of wind speeds and comes installed on a 30m, 50m or 65m free-standing tower to allow maximum energy capture.

What is a DW61 - 500kW wind turbine?

The DW61 - 500kW wind turbine is an optimized pitch controlled variable speed wind turbine. It boasts a track record of over 600 units based on its technology operating in the field. The new DIRECTWIND 61-500kW is a wind turbine that combines continuous market driven innovation with highly advanced and proven direct drive technology.

Why should you choose EWT's directwind 500 kW to 1 MW turbines?

EWT's DIRECTWIND 500 kW to 1 MW turbines deliver more power and uptime with the lowest cost of energy and highest return on investment, ideal for developing new distributed generation sites or repowering existing ones.

What is a syncwind 500 turbine?

The Windflow(TM) 500 turbine combines synchronous generation with SyncWind 's proven 2-bladed rotor with pitch-teeter coupling (PTC) and its advanced teeter control system (TCS).

What types of wind turbines does syncwind offer?

SyncWind currently offers two wind turbine products: the proven Windflow(TM) 33-500 for high wind speed sites and the Windflow(TM) 45-500 for medium wind speed sites. The Windflow(TM) 33-500 wind turbine has been designed for a 20-year life at a Class 1A site in accordance with IEC 61400-1:2005 (Edition 3).

We specialise in mid-size 500kW wind turbines with rotor sizes ranging from 39m to 52m in diameter. Typical of these is the Vestas V39 (39m rotor 500kW) wind turbine pictured below with an overall blade tip height of around 60m (200ft).

Proven 500 kW Wind Turbines, IEC Certified Design Sync Wind . currently offers two wind turbine products: the proven Windflow(TM) 33-500 for high wind speed sites and the Windflow(TM) 45-500 for medium wind speed sites.

## 500kw wind turbine generator

With a 54-metre rotor and a range of tower heights, the DIRECTWIND 54 is the ideal choice for distributed energy generation in low wind (IEC class IIIA) sites where planning permission and tip-height restrictions apply. Thanks to EWT's ...

Its compact size and low visual impact are just some of the many features that make this 250-500 kW wind turbine model a real success. LTW42 250 / 500 kW: DESIGN DATA: Rated power: 250 | 500 kW : Hub height: 28.4 m / 39 m : Wind ...

Freestanding wind turbines are more expensive to install, but they're much more effective if you're serious about going fully renewable or perhaps even benefitting from the Feed-in Tariff. Prices vary from around ...

The RRB Energy 500kW Wind Turbine Generator is a premier in its class with a track record of proven reliability and performance in addition to low operating costs. The versatile Turbine excels in many applications from community ...
