Brandon Spencer, President of ABB Energy Industries, emphasized ABB's commitment to providing safe, reliable solutions that accelerate the adoption of sustainable transportation in North America. The ...

ABB is supporting the BASF Zhanjiang Verbund site in China with its automation and digital technologies. Helping the BASF Verbund site achieve its smart and sustainable operations ambition, ABB will deploy its market-leading distributed control system ABB Ability System 800xA to connect and unify all operations across the related clusters ...

Our experience shows that such start-ups contribute to innovation across industries while helping address the world's energy challenges," said Per Erik Holsten, managing director ABB Energy Industries - Northern Europe. ABB Energy Industries intend to use the batteries in energy systems for a range of applications and industries ...

"We look forward to a fruitful cooperation with Ramboll", said Per Erik Holsten, Managing Director of ABB in Norway and ABB Energy Industries in Northern Europe. "The agreement with Ramboll is set to advance generation and transmission of renewable energy from offshore wind farms, crucial for the energy transition to net-zero."

With over 40 years of experience, ABB understands how to care for your automation and electrical system investment by delivering programs, services and tools that ensure your system is always safe, secure, reliable and serving your business needs.

ABB has signed a memorandum of understanding with Skyborn and Lhyfe to jointly realise and optimise the SouthH2Port hydrogen project in Sweden. The trio will focus on the large-scale integration of the production of ...

"This partnership supports our ambition of becoming a global leader in the green energy transition and shares the importance of well-designed and engineered offshore substations for the development of offshore wind.

With over 40 years of experience, ABB understands how to care for your automation and electrical system investment by delivering programs, services and tools that ensure your system is always safe, secure, reliable and serving your ...

The tie-up will see the development of integrated solutions, from renewable energy generation to fully electrified mining fleets. August 13, 2024. [Share Copy Link](#); [Share on X](#); [Share on LinkedIn](#); [Share on](#)

Facebook ... ABB process industries division president Joachim Braun said: "By working together, we will tackle electrification and make a ...

Simplicity and compatibility for all your industrial drive needs. Built on ABB's all-compatible drives architecture, the ACS880 offers unprecedented levels of compatibility and versatility to meet the precise needs of industries such as oil and gas, mining, metals, chemicals, cement, power plants, material handling, pulp and paper, sawmills and marine.

ABB provides application-based solutions at every stage across the dairy value chain, from grass to glass. Our domain expertise, energy efficient motors, drives and PLC technologies can help dairy production, processing cooling and logistics facilities boost productivity through precision control of rotating equipment.

ABB has signed a memorandum of understanding with Skyborn and Lhyfe to jointly realise and optimise the SouthH2Port hydrogen project in Sweden. The trio will focus on the large-scale integration of the production of offshore ...

Talk to an ABB expert Globally, we are collaborating with customers and partners to build a new hydrogen ecosystem. Our capabilities span the full hydrogen value chain from production, transportation, storage to consumption.

The water and wastewater sectors use 4% of the world's electrical energy - that's as much energy as the whole of Australia. ... Reaching Net Zero is a key goal for the water and wastewater industry and ABB is here to help. Many pumps, fans and aerators are run without intelligent speed control. Fixing this is low cost and will help ...

ABB will deliver an end-to-end electrification package for landmark natural gas project off the coast of Africa CCS JV, comprising Saipem, McDermott and Chiyoda, has signed a deal with ABB to provide comprehensive integrated and intelligent electrical systems for the east-African Mozambique LNG field which is expected to start production by 2024.

We aim to help you identify and promote improvement opportunities within your own teams - focusing on cost savings, energy efficiency, and decarbonization. We'll provide fresh ideas for your sustainable development program, especially ...

"With these process solutions PT Shell Indonesia will be able to optimise all aspects of continuous and batch operations at the existing brownfield site, monitoring and managing everything from raw materials use, product formulation, sub-recipes and recipes, resources, inventory logs, production batches and cleaning sequences," said Bert ...

In today's world of continuous operations, it is paramount to achieve optimal energy efficiency and harness

cutting-edge technology to comprehend and monitor energy consumption. Unfortunately, there's still a big gap in understanding how to translate energy data into practical insights and data-driven decisions to achieve maximised energy ...

Multi-national engineering and automation firm ABB, headquartered in Switzerland, said last week that it is delivering a fully-contained microgrid project for Jamaica Public Service Company (JPS), the island ...

Multi-national engineering and automation firm ABB, headquartered in Switzerland, said last week that it is delivering a fully-contained microgrid project for Jamaica Public Service Company (JPS), the island nation's sole electricity distributor and ...

"A new way of working": inside Equinor and ABB's unmanned oil and gas rig. We profile Equinor and ABB's use of automation and data to deliver their proposed unmanned oil platform in the North Sea.

ABB solutions enable animal feed producers to increase profitability by optimizing productivity, reducing energy consumption and minimizing waste. From production and processing to onward logistics, our motors, drives and programmable logic controllers (PLCs) can enhance safety, hygiene, reliability and sustainability right across the animal ...

This white paper reveals how battery energy storage coupled with renewable generation can enable decarbonization and provide alternative revenue streams for data centers. The white paper also shows the benefits of moving towards a microgrid-enabled data center comprising of battery energy storage.
