

Boosting decentral renewables projects will be crucial for Ukraine to improve the resilience of its energy infrastructure and meet its goal of 50% renewables in power generation by 2035. We will bring together Ukrainian and EU experts in Brussels to discuss investments in decentral renewable energy solutions in Ukraine - without waiting for ...

Currently, there is significant focus on the transition to green energy, particularly in achieving climate neutrality. The European Green Deal outlines one of the main approaches in this field, ...

The report envisions a scenario of shift towards domestic renewables and low-emission technologies, which would make Ukraine self-sufficient in terms of primary energy, reaching 98% by mid-century. This transformation would not only contribute to energy security but also mitigate the impact of regional and global energy crises on Ukraine.

6 ???· Ukraine's potential as a huge source of renewable energy makes this battle even more important. With the confidence of international investors and partners behind us, Ukraine can ...

3 ???· The United Nations Development Programme (UNDP) in Ukraine has delivered six gas-piston cogeneration units to the city of Kharkiv as part of the Green Energy Recovery Programme. This initiative is designed to address the city's critical energy needs and was made possible through the support of the governments of Norway, Sweden, and the European ...

Adaptiphy. Adaptiphy also offers a modular battery solution that comes in two cabinet sizes, with each battery cabinet supporting a minimum of 2 kWh and a maximum of 3 or 6 kWh capacity (depending on your chosen battery cabinet).

With over 50,000 cycles to end-of-life (EOL), a wide charge/discharge temperature range, and a lightweight design, this module offers dependable energy storage in any conditions. What sets it apart is our patented cableless magnetic interconnect - no tools needed, just insert and let the magnets do the work.
