What is China Southern power grid?

China Southern Power Grid ("Southern Grid") is one of China's two major state-owned power distributors that serve five southern provinces: Guangdong, Guangxi, Yunnan, Guizhou and Hainan. The region has witnessed a rapid build-up of power generation capacity, from 275 GW in 2015 to 350 GW in 2020.

How many kilowatt-hours does China Southern power grid use?

China Southern Power Grid said the five regions that it covers have consumed 540 billion kilowatt-hours of clean energy during the first nine months, with the renewable energy generation efficiency reaching 99.81 percent, up 0.22 percent year-on-year. Newly added installation of new energy reached 3.31 million kW.

How much will China Southern power grid invest?

[Photo/Xinhua] China Southern Power Grid, one of the country's two major power grids, vowed to invest 670 billion yuan (\$105 billion) recently in grid network construction during the 14th Five-Year Plan period (2021-25) to ensure power supply stability and boost green power consumption.

Can China decarbonize the southern power grid by 2060?

Decarbonization of the Southern Power Grid in China is feasible by 2060 but requires converting a large cropland area to support solar and wind energy; expansion of hydropower will impact the transboundary rivers according to a power system optimization model set up for 2020-2060.

What is a southern power grid?

Southern power grids extend approximately 2,000 kilometers from east to west, covering a variety of sources for power generation, including water, coal, nuclear, pumped storage, oil, gas and wind.

How many power grids are there in China?

As a hierarchical multi-area power system with multi-level dispatch centers, CSG governs five provincial power grids: Guangdong Power Grid (GDPG), Guangxi Power Grid (GXPG), Guizhou Power Grid (GZPG), Yunnan Power Grid (YNPG), and Hainan Power Grid (HNPG), which serve more than 252 million people (the basic overview is shown in Fig. 1).

2.1 Power grid in Southern China. In this paper, Southern China refers to five provinces including Guangdong, Guangxi, Guizhou, Yunnan, and Hainan, which are covered by China Southern Power Grid (CSG). CSG ...

It is the important hub for Guangdong Power Grid Corporation, even China Southern Power Grid. In addition, it serves as the critical portal of west-east electricity transmission project. ... give ...

The reporter learned from the industry that Aladdin Energy Group Co., Ltd., a subsidiary of Aladdin holding
