When did the Taliban return to power in Afghanistan?

The Taliban returned to power in Afghanistan in 2021, twenty years after their ouster by U.S. troops. Under their harsh rule, they have cracked down on women's rights and neglected basic services. Taliban fighters hold a flag for the Islamic Emirate of Afghanistan in August 2022. Ali Khara/Reuters

How much power does Afghanistan have?

Sector overview The total power generation capacity in Afghanistan stood at 641 MW in 2020 as per the latest available statistics from the International Renewable Energy Agency (IRENA). About 52 per cent of the capacity (333 MW) was accounted for by hydro, 43 per cent (277 MW) by thermal and the remaining 5 per cent (31 MW) by solar.

How much money does Afghanistan need to pay a power supplier?

Afghanistan is required to make a monthly payment of between USD20 million to USD25 million to power suppliers in Uzbekistan, Tajikistan, Turkmenistan and Iran, and as of October 2021, unpaid bills stood at USD62 million. The Afghan government had requested USD90 million from the United Mission to clear the dues.

Does Afghanistan have solar power?

Besides, solar energy accounts for over two-thirds of Afghanistan's total renewable energy potential of over 300,000 megawatts (MW). Given its approximately three hundred sunny days per year, Afghanistan is well-positioned to harness solar power. Afghanistan's solar energy potential is comparable to that of four sunbelt states in the United States.

Who are the Taliban?

Get the best of CFR in your inbox every Friday at noon. Sign up for The World This Week. The Taliban are a predominantly Pashtun, Islamic fundamentalist group that returned to power in Afghanistan in 2021 after waging a twenty-year insurgency.

Can Afghanistan meet its own energy needs?

With these resources, Afghanistan has the potential not only to meet its own energy demands but also to export surplus energy to other South Asian nations. However, it has only limited capacity to draw benefits from its resources. In the absence of sufficient hydropower projects, its river waters end up flowing into neighboring countries.
