Who is Aiko solar?

AIKO is a world-leading new energy technology company that focuses on R&D and manufacturing of PV core products and integrated solutions for power generation, storage, usage, providing customers with solar cells, ABC (All Back Contact) modules and scenario-based solutions. Multi-application solutions to fulfill various solar energy demands.

What is a Aiko solar cell?

AIKO is known as one of the first manufacturers to mass-produce solar panels with ABC (All Back Contact) solar cell technology. This technology involves placing both the positive and negative metal contacts to the rear of the solar cell, whilst they would normally be one contact on either side. This design has a few advantages:

What is Aiko solar's current manufacturing capacity?

Aiko Solar estimate their current manufacturing capacity is approximately 35GW per year for TOPcon cells and 100GW for ABC cells. Aiko Solar entered the Australian market at the Smart Energy 2024 event in Sydney. It revealed partnerships with local major solar distributors including Solar Juice, AC Solar Warehouse, Sol Distribution, and Tradezone.

Why is Aiko Solar a leader in cell technology?

Aiko Solar has been a leader in cell technology due to its innovative research, patent applications, and technology preparations. The company understands the importance of innovation for its survival.

How many Aiko solar panels are there?

Aiko currently has 20 panels approved under the name of "Zhejiang Aiko Solar Technology Co Ltd" including all three series of products for residential, commercial and utility uses. The NEOSTAR series targets residential users with a power range from 435W to 480W.

Are Aiko solar panels any good?

The main downside we found in our Aiko solar panels review is that they are very fresh to the Australian market. They don't have the same track record of some of the other brands to demonstrate their reliability and customer service.

AIKO is known as one of the first manufacturers to mass-produce solar panels with ABC (All Back Contact) solar cell technology. This technology involves placing both the positive and negative metal contacts to the rear of the solar cell, whilst they would normally be one contact on either side.

AIKO is a global-leading new energy technology company, focusing on the R&D manufacturing of solar generation products and PV-Storage-Charging integrated solutions, providing customers with solar cells, ABC
