Can Algeria deploy 1 GWP of solar photovoltaic capacity?

Image by Algeria's Ministry of Energy Transition and Renewable Energies. The government of Algeria on Friday opened a call for tenders for the deployment of 1 GWp of solar photovoltaic (PV) capacity. Technical and financial offers can be submitted by April 30, 2022, the Ministry of Energy Transition and Renewable Energy announced.

What are Algeria's New 3 GW solar tenders?

Algeria's new 3 GW solar tenders mark a major shift in its energy landscape, aiming to expand solar beyond remote areas and develop a local renewable energy sector. With high solar potential, the tenders reflect Algeria's commitment to reduce its reliance on gas and boost domestic solar capacity.

Why are Algeria's solar tenders so important?

With high solar potential, the tenders reflect Algeria's commitment to reduce its reliance on gas and boost domestic solar capacity. Algeria -- a nation traditionally dependent on gas -- is set to take significant strides in solar energy through two large-scale solar tenders with a combined capacity of 3 GW.

What is Algeria's solar energy project?

Completed in 2016, the project is a prototype and part of the country's transition, aimed at preserving fossil fuel resources and reduce greenhouse gas emissions. Houari Mahi is the head of engineering of Sonelgaz Energies Renouvelables, he explains to Euronews Algeria's potential regarding solar energy.

Can Algeria achieve 15,000 MWp of solar energy by 2035?

To diversify its energy mix, largely dominated by gas and oil, Algeria wants to achieve 15,000 MWp of solar energy by 2035. A call for tenders is underway to install solar power plants in several regions. The region of Laghouat is at the forefront of this conversion: solar kits have been distributed to remote villages and to nomadic populations.

How many solar power plants are being built in Algeria?

Recently, Sonelgez, the state-owned utility of Algeria, has launched a tender for the development and construction of 15 solar power plants with a combined capacity of 2,000 MW. These solar projects will have capacities ranging from 80 MW to 220 MW. Loading...
