Allset Energy is an independent energy lighting solutions and management provider that provides technology-driven LED consultancy for commercial or industrial establishments like hospitals, factories, schools, etc.

In a recent blog for our sister site PV Tech, Dan Shreves, VP of market intelligence at analysis and research firm Clean Energy Associates (CEA), wrote that 2023 will be the year the "hype cycle" ends for long-duration energy storage (LDES) technologies and providers will need to prove they can deliver on their promises.

Luxembourg: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO<sub>2</sub> - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.
