Spanning seven acres on the island's northern coast, the solar microgrid comprises 5,328 solar panels generating 1.410 megawatts of electricity. This energy is stored in 60 Tesla Powerpacks, allowing Tau to remain powered for up to three days without sunlight.

Now, the island runs on a completely renewable microgrid that meets 100% of residents' energy needs through solar power and battery storage. In 2016, the founders of Maui, Hawaii-based company Mana Pacific helped design and implement Ta'u's solar-energy microgrid composed of over 5,300 solar panels.
