Who is anern solar?

Anern designs and supplies residential solar systems using quality name-brand solar panels and solar panel mounting kits. Anern solar projects and anern solar lights are perfect for the contractor or handy homeowner/builder working with an electrician. Anern's Professional Design Teams Provide Customized Services for Your Needs.

Where is anern based?

Anern established its headquarters in Guangzhou, China in 2009. It is mainly engaged in the R&D, production and sales of solar energy product such as solar lithium batteries, solar accessories, and solar energy storage systems, and provides customers with high-quality guaranteed solar energy products.

What is an anern Solar System?

The main material of solar panels is silicon, which absorbs sunlight then convert it into electrical energy to generate. Anern's solar systems include off-grid solar system and grid-connected solar system. It is a portable solar energy storage system that can be flexibly set in a variety of modes.

What are anern N-series solar panels?

Anern's N-Series solar panels utilize a combination of half-cut cell technology and bifacial modules. It also utilizes Hot 2.0 technology for increased reliability. Compared to traditional solar panels, it absorbs sunlight on both sides so that the power output and efficiency of the module is greatly improved.

What types of solar systems does anern offer?

Anern's solar systems include off-grid solar system and grid-connected solar system. It is a portable solar energy storage system that can be flexibly set in a variety of modes. Anern has two low-frequency inverters, which are WSPI series with high conversion efficiency and SPI series with UPS function.

Does anern sell solar lights?

Anern owns complete product series of solar lights, solar power systems, and various types of led indoor and outdoor lights. We have successfully completed hundreds of mega government projects in more than 180 countries. Contact Anern!

Anern is a leading manufacturer of types of solar charge controllers including MPPT solar controller and PWM solar controller to control the charge and discharge conditions of the battery, which can increase the power generation of the solar module.
