Living in areas with no electricity connectivity, or tired of paying electric bills DAT AT-9028B Home solar lighting system is the perfect solution for home emergency, night reading, exploration, camping and outdoor activities.

This page presents an initial draft of the country profile on Angola from the Off-Grid Lighting Assessment, a collaborative effort of the UNEP en.lighten initiative and the Lumina Project. This is one of 80 country profiles that estimate the savings potential and benefits of switching from fuel-based lighting to solar LED lanterns.

Using solar energy lights is a smart lighting solution that is energy-efficient and environmentally friendly. Additionally, it brings numerous benefits in terms of installation cost, operating solely on solar power, with an operational lifespan of up to 15 years, making it suitable for rural road lighting projects and urban transportation.
