o Manage the Spectrum Power 7 configuration, data transmission, and communications. o Generate, organize, and access the information used in a Spectrum Power 7 system. o Provide the user interface to the information. o Provide the SCADA and historical data information capabilities. o The relationships of the applications within Spectrum

The average additional variance among power spectrum estimates caused by differences among system and transducer performance was estimated to be 0.32 dB 2 in the +10 dB band-width. Its contribution to the overall variance among power spectrum estimates will depend on the number of independent acoustic A-lines included.

To realize enough computing power for AGV navigation with low heat generation, our Spectra PowerBox 310-i5 is equipped with the low-voltage Intel#174; Core(TM)i5-8365UE processor. Connectivity In an autonomous driving system, wireless communication (Wi-Fi, Bluetooth, 5G, GPS, etc.) is very important for higher-level coordination.
