How much natural gas is produced in Vaca Muerta?

The Vaca Muerta formation accounts for more than 70% of Argentina's natural gas production, reaching 74% (3.8 Bcf/d) in September 2024. Rising production of crude oil and natural gas from the Vaca Muerta formation has increased export opportunities for both fuels.

How is Vaca Muerta helping Argentina get back to record production?

Growth in the Vaca Muerta is helping Argentina to get back near its record oil and gas production of some 20 years ago. That's spurring not only the shale oil export project, but deals to pipe natural gas to Brazil and plans to liquefy and ship the fuel to Europe and Asia.

Will Argentina export liquefied natural gas by 2032?

The government's goal is to export \$15 billion worth of liquefied natural gas annually by 2032, up from zero currently. "Until now, all gas projects were done by the state as public works. Now that's not an option," said Daniel Dreizzen, Argentina's former secretary of energy planning and now director of Aleph Energy, a consulting firm.

How much natural gas is produced in Argentina?

An average of 5.0 billion cubic feet per day (Bcf/d) of natural gas was produced in Argentina over the first nine months of 2024, 5.2% more than the same period in 2023. In August, natural gas production averaged 5.4 Bcf/d, the most of any month in 21 years.

Why is Argentina reversing Vaca Muerta pipelines?

Meanwhile, Argentina is investing in infrastructure to expand the distribution of natural gas from the Vaca Muerta formation to northern Argentina, including reversing pipelines designed for imports from Bolivia in order to export natural gas to Brazil.

Will Vaca Muerta be a major gas exporter?

Our Standards: The Thomson Reuters Trust Principles. Natural gas production is booming in Argentina's vast Vaca Muerta shale lands, but full pipelines and the government's free-market approach to paying for new ones may prevent the country from becoming a major gas exporter by early next decade.

Argentina: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across ...

Argentina: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO₂ - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas ...
