

Armenia inverter power backup for home

On-grid solar inverters are most commonly used in homes or businesses. These systems do not require a battery as they run on the main power. Choosing this system will allow you to store the extra electricity produced by your power plant in the main for later use. And thanks to the metering law in Armenia: "...

A hybrid solar system is a blend of both on-grid and off-grid solar systems, as it is connected to the grid and incorporates a battery backup. When there is a power supply from the grid, the solar inverter functions as an on-grid inverter. Any surplus power generated after meeting device requirements is channeled into both the grid and the battery.
