Do electronics work in Aruba?

Summary: If you're coming from the United States, your electronics should work seamlessly in Aruba. Plug adapters allow you to physically connect your devices to the electrical outlets in Aruba, while voltage converters or transformers modify the voltage to match the requirements of your devices.

Does Aruba offer outdoor Wi-Fi?

Delivering great outdoor Wi-Fi can be challenging, and Aruba is committed to removing the barriers with solutions like the 360 Series. The 360 Series APs offer several key benefits:

What kind of electricity does Aruba use?

Electricity in Aruba is 110 volts, the same as the standard in the United States. The power outlets in Aruba are Type A, B, and F. In the United States, they use just Type A and B. This does mean that you'll find the same plugs in Aruba as in the United States and your electronics should be compatible. It never hurts to check though!

What is the standard voltage in Aruba?

In Aruba, the standard voltage is 110V voltage and 60Hz. If your devices are not compatible with this voltage, you may risk damaging them if you plug them in without appropriate converters or transformers. Type A, B, and F plugs are the standard in Aruba, similar to North America.

Does Aruba use a plug?

In the United States, they use just Type A and B. This does mean that you'll find the same plugs in Aruba as in the United States and your electronics should be compatible. It never hurts to check though! Do I need to bring an adapter to Aruba?

Does Aruba have a reliable power supply?

While Aruba generally has a reliable power supply, occasional power outages can still occur due to factors such as storms or maintenance. To protect your electronics from power surges during these instances, consider using surge protectors. These devices help prevent damage to your equipment by diverting excess voltage away from them.
