What is Atlas Copco's energy storage system?

Atlas Copco's Energy Storage Systems takes modular energy storage to a new level with up to 575kWh of Nominal Energy Storage Capacity. View our products today!

What does Atlas Copco do?

This is where Atlas Copco have done much of the considerations already. Our focus is harnessing electricity using specialist batteries, often called 'BESS' (Battery Energy Storage Systems), to be used at a more convenient time and later and increase its value economically.

What new products does Atlas Copco offer?

The additions to Atlas Copco's portfolio include a larger ZBC 300-300 unit and a smaller line of battery-based storage systems, the ZPB 45-60, ZBP 45-75, ZBP 15-60 models, and the ZBP 2000 with two flexible solar panels.

What is the eco controllertm by Atlas Copco?

The ECO Controller™ by Atlas Copco, is a human-machine interface (HMI) that provides operators with full control over their temporary power applications by optimizing energy generation, distribution, and consumption through advanced data management. WHY ECO? WHAT DOES IT DO?

Is Atlas Copco responsible for errors or changes in data?

Atlas Copco is not responsible for any problem that may occur due to errors or changes of these data. They can also be changed or rectified without prior notification.

What type of battery does Atlas Copco use?

All associated with using fuel. Safety - There are many battery types - Atlas Copco only use Lithium Phosphate Ion (LiFePO₄ abbreviated as LFP) as it is scientifically proven to be a more stable when charging and non-explosive compared to other Lithium-Ion or cheaper battery types.
