

Atrius energy Martinique

What is marketing solutions manager Atrius; facilities?

Marketing Solutions Manager Atrius; Facilities is a cloud-based building management system(BMS) software solution designed to enhance building operations and reduce energy usage.

What can Atrius do for You?

Atrius transforms your building into an intelligent, responsive environment that benefits owners, operators, and occupants. Gain portfolio-wide clarity and control over energy use and carbon emissions, optimize consumption, reduce costs, and gather data for mandated sustainability reporting. Get to know the solutions:

What is Atrius & how does it work?

Atrius offers an extensive suite of apps that turn outdated buildings into intelligent spaces and reshape how people experience them. Enable your buildings to sense, think, and act. Part of the Intelligent Spaces Group at Acuity Brands.

What is Atrius facilities?

"Buildings have long been large, complex assets with so much untapped potential; Atrius Facilities is designed to unlock that value by using data to create meaningful differences in how end users experience spaces," comments Michael Westerfield, Senior Director of Product, Building Performance Applications, Atrius, Acuity Brands.

How can Atrius; energy help Weber State save money?

Automatically normalize data against weather or occupancy changes to compare building performance across locations. "Weber State has saved over \$2.3 million since 2020 using Atrius; Energy to identify,scope,and verify energy projects." Encourage occupants to reduce energy consumption by sharing dynamic storyboards across public screens.

How can Atrius help reduce energy consumption?

Encourage occupants to reduce energy consumption by sharing dynamic storyboards across public screens. "Atrius makes energy and emissions data readily accessible to faculty,students,and consultants who appreciate the intuitive,user-friendly format." Ready for a deeper dive?

Renewable energy generation. For achieving absolute reductions in CO2 emissions, transitioning to renewable energy is a great opportunity that can also reduce long-term energy costs by feeding energy back into the grid. Waste reductions and diversion. Costs linked to landfilling or properly managing hazardous waste are high for most industries.

The International Energy Agency (IEA) calls energy efficiency the "first fuel" in clean energy transitions because of its quick, cost-effective emissions reduction opportunities. It also lowers energy bills and strengthens energy security by avoiding unnecessary energy demand. Digitization is an essential feature of a clean power future

Atrius's Sustainability & Atrius's Energy are available to organizations across Europe to help facility teams reach ambitious sustainability goals by design. The robust application streamlines access to energy consumption metrics, automates manual data management processes, and enhances visibility into overall building performance.

Edge to cloud building management system coming this fall. Buildings are designed to last for decades.
