Will Navitas develop a next-generation lithium ion 6T battery?

Navitas Systems has been awarded a contract to develop a next-generation lithium ion 6T battery system for use in military applications. Awarded by Alion Science and Technology, the \$1.55m contract requires the company to develop a second-generation Ultanium Military 6T battery for ground combat vehicle applications.

Does Navitas Systems offer any warranty?

Performance may vary depending on use conditions and application. Navitas Systems makes no warranty explicit or implied with this documentation. Copyright 2021 Navitas Systems, LLC.

What can Navitas do for You?

Navitas expertise in translating from bench to production-intent custom cells. Navitas teams with DOD primes that have system integration, safety and thermal management expertise complementing our cell development and production capability. Prototype cells and battery incorporating high capacity silicon alloy anodes.

Does Regar Australia have a battery management system?

Live data for monitoring the vehicle in real-time with the ability for fault diagnosis. Bluetooth app (Navitas Dashboard) available for both iPhone and Android. Although they are not required, Regar Australia recommends upgraded 2 gauge battery cables. If you are combining with Lithium - All Lithium batteries use a BMS (Battery Management System).

How many amps does Navitas have?

In sizes from 550 to 1050 lithium amp hours. Navitas participates in multi-billion dollar markets including the government/defense industry and the forklift industry. The growth in these markets - from over \$11B today to \$55B in 2022--assures our company and its associates an expanding set of opportunities to serve customers well into the future.

Does ACP have a contract with Navitas Systems?

St. Clair Shores, MI (March 31, 2022) -- ACP Technologies LLC, a U.S. producer of high-performance, synthetic graphite for batteries, today announced it has entered into an agreement with Navitas Systems, a U.S. leader in comprehensive energy storage solutions and a U.S. Department of Defense (DoD) contractor. According to the contract,

This guide is dedicated to educating readers about Lithium batteries in Golf Carts. Traditionally electric Golf Carts have used lead-acid batteries. Older models will usually have 6 x 6 volt batteries (for 36V), newer 48 volt models have either 4 x 12 volt, 6 x 8 volt or 8 x 6 volt batteries wired in series. The lead a

Each brand of Lithium Battery will have a different continuous current limit set in the BMS, for example, 200

amps continuous for 10 seconds could result in the BMS shutting down. Because the Navitas offers additional programmability, it could be possible that the programming pushes the battery outside of the BMS parameters.

Multi-platform airborne Li ion battery Navitas teams with DOD primes that have system integration, safety and thermal management expertise complementing our cell development ...

I have an Onward with Navitas AC conversion/600a controller on the stock lead acid batteries. I'm underwhelmed with acceleration and battery life using the oem batteries and want to upgrade to lithium. I'd prefer a "plug and play" setup because I don't feel comfortable piecing together a kit myself and am unaware of any local to help.

Elevate your vehicle with Navitas" controllers and kits specifically designed for your vehicle! Experience unmatched performance, increased efficiency and an easy install. ...
