

# Australia solar panel calculator for home

What is the solar panel calculator?

Our Solar Panel Calculator is a quick quiz used to discover the optimal solar system size for your home. Just answer a few basic questions about your home and energy usage and the Solar Panel Calculator crunches the numbers for you. Now you know your ideal solar system size, plug that into our Solar Calculator to:

What is a solar & battery calculator?

Not-for-profit SunSPOT solar and battery calculator estimates your system size, the cost, and how much you'll save, privately and simply. Built by UNSW for the APVI and supported by the Australian Government. SunSPOT complements the advice in the Australian Government's Solar Consumer Guide. What do you want to know?

How do I use the solar power calculator?

Simply use the solar power calculator to enter how much you're currently paying for your energy bills. Our calculations are based on what you would save with a 6.6kW solar system and provide you with an estimated bill price, what you would save on each bill and how much you would roughly save each year. Try it for yourself today to find out more.

How does a solar cost calculator work?

A solar cost calculator is pretty simple when you boil it down. It looks at your desired solar system capacity (in kW), converts it to watts, and then multiplies that number by the average cost per watt for a residential rooftop solar PV system. Why should I trust your Solar Calculator?

What factors affect the price of solar panels in Australia?

Our calculator takes these into account and you can be sure you're getting accurate results at the time of calculation. This includes things like the Australian government solar rebate, state rebates, your feed-in tariff and the price to install the panels. All of these can impact the price you pay.

Who owns a solar system in Australia?

In Australia most solar systems are owned directly by the electricity consumer, usually a homeowner. Sunulator can also assist community organisations to install solar systems via additional investment options: A community organisation acts as an electricity retailer. Economic returns are estimated both for investors and the host site.
