How much solar power does Austria have?

As of the end of 2022, solar power in Austria amounted to nearly 3.8 gigawatt (GW) of cumulative photovoltaic (PV) capacity, with the energy source producing 4.2% of the nation's electricity.

Where is the largest solar power plant in Austria?

Construction began on Austria's largest solar power plant, a 120 MW solar park, in Nickelsdorf, a small town in eastern Austria [in June 2022]. It is part of a hybrid wind-solar project with a 164 MW wind farm.

Will Austria increase solar thermal technology in 2023?

The Austrian government's plan to accelerate the expansion of photovoltaics with a budget of USD 647 million in January 2023 is likely to increase the use of solar thermal technologies in the coming years. The Ministry has also raised the funding budget for small-scale systems.

Will Austria achieve 100% renewable electricity generation by 2030?

In addition to supporting PV installations through permitting simplification and cash grants, the Austrian government is targeting 100% renewable electricity generation by 2030.

Why is bioenergy important in Austria?

Bioenergy in Austria mainly contributes to the renewable heating sector, producing 58% of renewable heat (31,386 GWh of a total 53,585 GWh) consumed.

What is geothermal power used for in Austria?

In Austria, geothermal power has a small potential of about 2,000 MW thermal power and 7 MW electric power. Geothermal power is mainly used for thermal baths. Only 25% of the deep drillings in Austria from 1977 until 2004 were used for electricity generation.

This report provides an in-depth analysis of Austria's PV market and developments over the past year. 2023 was a landmark year for PV installations in Austria, with a total of 2.6 GW of new photovoltaic capacity installed, representing one of the ...

The Austrian Solar Energy Market is segmented by Technology (Solar Photovoltaic (PV) and Solar Thermal) and End User (Residential, Industrial, and Utility). The report offers the market size and forecasts for solar energy in installed capacity (megawatts) for all the above segments.

The Austrian Solar Energy Market is segmented by Technology (Solar Photovoltaic (PV) and Solar Thermal) and End User (Residential, Industrial, and Utility). The report offers the market size and forecasts for solar energy in ...

The Austrian Federal Ministry for Climate Protection, Environment, Energy, Mobility, Innovation and Technology (BMK) has allocated EUR135 million for solar rebates in 2024. Austrian agency OeMAG is distributing the incentives under the nation's EAG legislation.

Austria is currently involved in seven of the eight ongoing tasks. One of the areas that will become particularly prominent in future is building-integrated photovoltaics (BiPV), a technology being researched as part of IEA PVPS Task 15 under the leadership of Austria. PV facilities can be integrated into a building's concept as active ...

OverviewSources of renewable electricity generationGovernment targetsGovernment policyThe use of hydropower in Austria has a long tradition. At the beginning of the 20th century, hydropower was mostly used for sawmills, mills and forging hammers. Today it is used to generate hydroelectricity. Because of its mountainous terrain from being situated in the Alps, Austria has a large share of hydropower resources. The range of hydropower plants installed...
