Opportunities for Residents and Investors. In November 2018, the BVI brought into force Renewable Energy Regulations made under a 2015 amendment to the British Virgin Islands Electricity Corporation Act. The BVI is well positioned to generate several forms of renewable energy--wind, solar and hydro energy being the most obvious.

NIAR Automated Technologies Laboratory for Aerospace Systems (ATLAS) partnered with Axiom Materials to investigate the automated fiber placement (AFP) of AX-7810UD-330N610-0.5" a solvent-based Ox-Ox Ceramic Matrix Composites (CMC) unidirectional slit tape that can be used for high temperature applications up to 1,650 °F, such as engine components.

From its initial start as private/public autonomous and individual producers of electricity, the government owned public electricity supply was established in the 1950's. At that time, the BVI's main source of electricity was produced by one 20 KW generator, which provided six hours of service per day and supplied 63 consumers between Government house and...
