

Bahamas off the grid system

Island Solar is based in Nassau, Bahamas and is committed to installing safe, high quality, code compliant and long lasting solar electric (photovoltaic) systems in the Bahamas and across the ...

In a remote area of the Bahamas, an innovative off-grid solar solution has been implemented to power a residential home entirely, cutting the inflated costs and environmental impact associated with running a full-time diesel generator.

Island Solar specialize in off grid solar electric systems in the Bahamas. It is important to understand a few key points if you would like to live completely off grid. When we design an off grid system, we need to size your system for the lowest sun months of the year.

An islands wide grid system operated by Bahamas Power and Light (BPL) is available on New Providence(Nassau) using a gas turbine engine while 23 islands have diesel generators with mini grids covering each island. 60% of power is generated from oil based generators.

An off grid solar electric system is perfect for people whose home is far from the utility grid. It is also a perfect system for those who desire true energy independence and are willing to live in an energy efficient and mindful way.

In a remote area of the Bahamas, a residential home transitioned from full-time diesel generator reliance to a sustainable, cost-effective off-grid solar solution. By implementing Sol-Ark inverters and HomeGrid storage, this project cut inflated energy costs and environmental impact.

The PV panels on this off-grid system power the house and charge the 2 LFP-15 Fortress Power batteries during the day. In the evening, the Fortress batteries supply the power to the house until the sun comes out again ...

The PV panels on this off-grid system power the house and charge the 2 LFP-15 Fortress Power batteries during the day. In the evening, the Fortress batteries supply the power to the house until the sun comes out again the next day. The batteries allow the homeowner to live independently of the grid and maintain power in the case of an outage.

Island Solar is based in Nassau, Bahamas and is committed to installing safe, high quality, code compliant and long lasting solar electric (photovoltaic) systems in the Bahamas and across the Caribbean. We specialize in commercial systems from 50 kW to multi-megawatt utility scale systems.

In The Bahamas, your return on investment can be as high as 20% or more! There are 2 types of systems. Grid Tied and Off Grid. For both, the key issue is a knowledgeable and trustworthy installer. Proper site assessment (condition and orientation of roof) is a must. Read more..
