

Bahamas solve green energy

What is a solar energy microgrid in the Bahamas?

This initiative involves developing solar energy microgrids across the Family Islands. This also encompasses the Government's goal of The Bahamas having a 30 per cent renewable power generation by the year 2030.

Who supports solar power in the Bahamas?

This goal is supported by the Inter-American Development Bank (IDB) and the Bahamas Development Bank (BDB). Currently, solar power makes up less than 1% of all energy generated in The Bahamas. Oil is responsible for nearly all power generation with a 99% share of electricity production.

What is the energy efficiency initiative in the Bahamas?

With energy-related costs estimated at 15% to 20% of annual operating budgets for small- and medium-sized hotels in the Bahamas, the Bahamian hotel industry launched a significant energy efficiency initiative in 2013 in partnership with the Government of the Bahamas to reduce energy-related costs.

Can the Bahamas produce 30% of its energy by 2030?

The Bahamas aims to produce 30% of its energy from renewable sources by 2030, according to the country's goals. Justin Locke and Chris Burgess of the Islands Energy Program are optimistic that the country can exceed this target. 'The price of renewables have come down to the point where they're now very, very competitive with diesel,' Burgess said.

Will the Bahamas have a 30 per cent renewable power generation?

This also encompasses the Government's goal of The Bahamas having a 30 per cent renewable power generation by the year 2030. The Minister explained that microgrids will ensure consistent and reliable power output for island inhabitants, addressing unique island requirements.

Is the Bahamas ready for a sustainable future?

The Prime Minister said the choice The Bahamas faces is stark. "Continue down a path of expensive, unreliable energy or pivot towards a future where energy is sustainable, affordable and secure." He noted that this Government administration's number one focus is reducing the cost of living for every Bahamian.

Greensolver was created as we felt there was a real need in the market for an experienced and independent renewable energy services provider catering to the infrastructure investors to deliver professional, world class services. Greensolver was until 2013 a subsidiary of Veolia Environnement and Eolfi where it became quickly a leading independent technical expert in ...
