What does Illumina do?

At Illumina, our goal is to apply innovative technologies to the analysis of genetic variation and function, making studies possible that were not even imaginable just a few years ago. It is mission critical for us to deliver innovative, flexible, and scalable solutions to meet the needs of our customers.

What are the different types of Illumina distributors?

Our network of global channel partners includes two different types of distributors. Illumina value added distributors provide sales, marketing, service and support, whereas Illumina distributors sell Illumina products but do not provide service or support. Explore the list below to find a distributor in your region.

How does Illumina process my personal information?

Illumina will process your personal information to contact you by email and/or phone for marketing purposes on the basis of its legitimate interests and in accordance with Illumina's Privacy Policy. You can unsubscribe from being contacted by Illumina at any time by clicking here.

What is Illumina sequencing & array technology?

Illumina innovative sequencing and array technologies are fueling groundbreaking advancements in life science research, translational and consumer genomics, and molecular diagnostics. For Research Use Only. Not for use in diagnostic procedures (except as specifically noted).

Illumina Services takes pride in representing some of the most esteemed vendors in South Africa, each of which complements our commitment to excellence. These partnerships empower us to provide you with cutting-edge solutions that transform the way you do business.
