Should you buy a solar PV system in Barbados?

One of the biggest, if not the biggest hurdle to further solar PV penetration in Barbados is the upfront cost of a system. When you think about the fact that the cost is essentially the prepayment of 25-30 years worth of electricity it makes sense that the price is "high". If you could purchase a ... Continue reading ->

What is the installed solar PV capacity in Barbados?

The total installed solar PV capacity in Barbados is about 22MW(12MW RER +10MW utility).

Does Barbados use solar panels?

Solar panels are seen more and more frequently across Barbados. Similar to the ubiquitous solar water heater on Barbadian rooftops, the Government of Barbados is fully committed to the idea of renewable energy and solar PV, thereby preparing the country for even more substantial growth in this sector.

Who is barefoot power?

Barefoot Power is a leader in the design, manufacturing and distribution of solar powered assets that enable sustainable lifestyles and generates income to off-grid/weak-grid households and communities in Africa and South Pacific.

Do Barbadians use solar energy?

Approximately 50% of all households in Barbados have 50,000 installations of solar energy systems. This awareness and usage of solar energy have increased due to the significant decrease in costs over the past few years.

Barbados-based renewable energy developer Blue Circle Energy is partnering with a company from Germany to build 50 solar projects, generating 60 MW of energy, across the island's 11 parishes, starting next year.

In order to minimise the impact of this expense, the Government of Barbados (GoB) in the Barbados National Energy Policy (BNEP) 2019 - 2030 has outlined a plan for transitioning the country from a fossil fuel dependant ...

Below is a list of the major solar panel installers in Barbados, providing both residential and commercial solar PV installations. Before you obtain quotes, find out what questions to ask. #1 recommendation for residential
