A program of retraining for new technology that will affect 2,800 households across the 14 Pacific Island Countries is aimed at creating Solar Engineers to install and maintain solar systems and further enabling them to become professional solar trainers.

Barefoot solar Bouvet Island

L'isola Bouvet si trova a una latitudine di 54°26' S e a una longitudine di 3°24' E. Occupa una superficie di 58,5 km², ed è quasi interamente coperta da ghiacciai. Non ha porti né approdi, solo ancoraggi al largo, ed è difficile da approcciare. I ghiacciai formano uno spesso strato di ghiaccio che si getta con alte pareti nel mare o sulle spiagge nere di sabbia vulcanica.
