

BASF Stationary Energy Storage GmbH (BSES) is a wholly owned subsidiary of BASF SE. BSES distributes the NAS batteries and co-develops the next generation of sodium-sulfur batteries together with NGK Insulators Ltd. About NAS batteries. NAS batteries are a megawatt class large-capacity storage battery, implemented practically for the first time ...

As part of the transaction, BASF and LetterOne received \$2.15bn in cash and new shares in Harbour Energy, resulting in a 54.5% ownership of the enlarged Harbour entity. The enterprise value of the Wintershall Dea assets was agreed at \$11.2bn, which included the transfer to Harbour Energy of Wintershall Dea's outstanding bonds valued at ...

BASF has a bold decarbonisation strategy which matches many of the world's leading economies in targeting net zero emissions by 2050. Central to this transition is the use of technologies, which will replace fossil fuels with ...

In 2023, we built a stationary long-term sodium sulfur-based storage system (NAS ®) at our Schwarzheide site in Germany. It supports the power supply of individual systems via the plant's own solar park. Together with NGK Insulators Ltd., BASF Stationary Energy Storage GmbH makes NAS batteries and develops them further.

BASF Stationary Energy Storage GmbH (BSES) is a wholly owned subsidiary of BASF SE. BSES distributes the NAS batteries and co-develops the next generation of sodium-sulfur batteries together with NGK ...

BASF Stationary Energy Storage GmbH (BSES) is a wholly-owned subsidiary of BASF SE. BSES is the exclusive distributor of the NAS® batteries and co-develops the NAS® technology together with its Japanese partner NGK Insulators Ltd.

The initiator for shifting to renewable energy is driven by our overall corporate strategy for the chemical business. We have an ambitious commitment to achieve the targets of the Paris Climate Agreement, and at BASF, we want to reduce CO2 emissions by 25% by 2030 compared with 2018, and in 2050 we want to become net zero. BASF will electrify chemical ...
