Sort of like renting a battery. You buy a vehicle, but you don't pay for the battery up front. Instead, you take a subscription that allows you to spread the cost over a longer time frame. And each time you need to swap out your discharged battery for a new one, just visit the station and you're good to go. It's Battery-as-a-Service or BaaS.

Solar electricity will be produced by a hybrid 15.3 MWdc (13.2 MWac) solar photovoltaic (PV) plus 10.2 MWac/12.9 MWh battery energy storage system facility. Extensive safeguards to protect Palau's pristine environment

Battery-as-a-Service (BaaS) is an electric vehicle (EV) ownership model that seeks to eliminate the vehicle's costly battery component in favor of an infrastructure that allows users to subscribe in exchange for the ability to swap a depleted battery for a fully charged one at a swapping station.. The advantages of this method are twofold.
