Greenstat's first solar power plant in Bosnia Herzegovina has reached an important milestone. The Norwegian company said the Petjnik photovoltaic system has transitioned from the construction phase to testing.

Bugojno plans to grant concession for two solar plants with combined capacity of 50 MW. According to the public call issued by the Central Bosnia Canton's Ministry of Economy, the maximum installed capacity of the two power plants, called Gra?anica 1 and Gra?anica 2, would be 50 MW. The concession will be granted for a period of 30 years

Scaling-up Solar PV in Bosnia and Herzegovina October 020 1. Introduction Bosnia and Herzegovina has applied for membership of the EU. Once the country joins the EU it will need to adopt the EU Climate Acquis in its entirety, which will result in significant changes in incentives in the power sector.

Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the classes (for comparison).

Bosnia and Herzegovina is well endowed with renewable energy resource potential; however, the sector is still in its initial stage of development. While biomass is the most abundant renewable energy ...
