

What is a battolyser?

Battolyser Systems, a Dutch electrolyser manufacturer, is at the forefront of the energy transition with their groundbreaking innovation: the Battolyser that unlocks 100% renewable hydrogen. This breakthrough technology offers 100% flexibility, promising the lowest long-term energy costs for renewable hydrogen production.

What is battolyser doing in Rotterdam?

The company is currently constructing its first Megawatt system in the Port of Rotterdam, the hub of the Dutch hydrogen ecosystem. Concurrently, Battolyser Systems is developing a state-of-the-art manufacturing facility with an annual capacity of up to 1 GW of Battolyser units.

How is battolyser systems scaling up its operations?

Battolyser Systems is taking significant steps toward scaling up its operations. The company is currently constructing its first Megawatt system in the Port of Rotterdam, the hub of the Dutch hydrogen ecosystem.

Is battolyser safe?

Battolyser is intrinsically safe in any operational mode, even at low and rapidly changing loads. Its patented Nickel-Iron technology is inherently robust and has industry leading efficiency and durability. Battolyser Systems can be a major accelerator for the EU to reach its goals on climate, industry, strategic autonomy and economic growth.

Can battolyser achieve net zero?

Invest in technologies that can meet the scale of the energy transition all the way to net zero. Battolyser is now available to support achieving this goal. Battolyser can achieve the lowest power cost, thanks to its high efficiency and ability to arbitrage between selling power and producing hydrogen.

Battolyser has developed and manufactures the world's first integrated battery/electrolyser system. A Battolyser can produce hydrogen from solar and wind when power prices are low and provide electricity to the grid when prices are high. The system is extremely flexible, efficient and robust.

A Battolyser at its core, is an electrolyser with battery functionality powered by patented Battolyser technology. With electrodes composed of iron and nickel, we provide a solution that operates 100% flexible and is intrinsically safe and robust.

Battolyser Systems, a Dutch electrolyser manufacturer, is at the forefront of the energy transition with their groundbreaking innovation: the Battolyser that unlocks 100% renewable hydrogen. This breakthrough technology offers 100% flexibility, promising the lowest long-term energy costs for renewable hydrogen

production.

The Battolyser concept offers a potentially simpler and more efficient way to store energy and produce hydrogen by combining battery and electrolysis functions. This could improve renewable energy integration and potentially outperform

Battolyser Systems develops and builds a new electrolyser design that can also function as a battery - a "Battolyser". These systems can fully follow intermittent power supply at high efficiency and throughput. It is made from abundant ...

Battolyser has developed and manufactures the world's first integrated battery/electrolyser system. A Battolyser can produce hydrogen from solar and wind when power prices are low and provide electricity to the grid ...

Battolyser Systems, a Dutch electrolyser manufacturer, is at the forefront of the energy transition with their groundbreaking innovation: the Battolyser®; that unlocks 100% ...

Battolyser Systems develops and builds a new electrolyser design that can also function as a battery - a "Battolyser". These systems can fully follow intermittent power supply at high efficiency and throughput. It is made from abundant materials - without dependence on rare earths - and aims to be the most sustainable source of Green hydrogen.

Battolyser Systems, the manufacturer of the world's only electrolyser with battery functionality that enables the lowest cost green hydrogen, has raised EUR30 million in Series A funding from Global Cleantech Capital, Innovation Industries, and Invest-NL.

Battolyser®; is a EU compliant electrolyser technology with no dependence on critical raw materials, based on secure supply chains and "made in Europe". Flexible By instantly following the intermittent nature of renewable energies, the Battolyser®; ensures the production of 100% green hydrogen and enables the lowest cost green hydrogen in ...

Schiedam, the Netherlands-based Battolyser Systems, a developer of the world's only electrolyser with battery functionality, announced that it has secured a EUR30M Series A investment round from Invest-NL, Global Cleantech Capital, and Innovation Industries.
