

Who are BCD energy?

BCD Energy provide a range of services for the domestic and commercial market. One half of BCD Energy specialise in engineering design and consultancy. The other half specialise in providing renewable energy solutions to both the domestic and commercial sector.

What is the government electrification strategy in the Gambia?

The government electrification strategy has embraced both grid-based and off-grid options. The Gambia has abundant renewable energy resources that could help meet growing demand. The Gambia has abundant solar energy resources across the country, a good biomass resource in most areas, and a modest wind regime along the coast.

How much solar power does the Gambia have?

According to the International Renewable Energy Agency (IRENA), The Gambia only had 2 MW of installed solar photovoltaic capacity at the close of 2022. Similarly, in the realm of wind energy, only small-scale projects initiated by private investors and non-governmental organizations are currently in operation.

Is there a solution to energy problems in the Gambia?

Policy makers across Africa have been among the last to embrace RE as a solution to their energy problems. They are often locked into crisis management on a day-to-day basis. The country's policy makers need to be persuaded that RE has a real future in the energy mix of The Gambia. They need to demonstrate this by their actions.

Why is energy important in the Gambia?

The availability of adequate, reliable, affordable and sustainable energy is a critical milestone in the socio-economic development of any country. While less than half of all households in The Gambia have access to electricity, over 90% are still dependent on solid biomass for cooking and heating. This has intensified poverty.

Will RE be a part of the Gambia's energy future?

The Gambia has already started this process by setting up a strong policy that includes RE as part of its energy future. It is in the process of building the institutional and legal framework that will help to deliver this promise.

The Gambia's green energy revolution, its commercial potential for green hydrogen production and more will be explored at the upcoming MSGBC Oil, Gas & Power 2023 conference and exhibition. The two-day event will take place in Nouakchott on November 21-22, under the esteemed patronage of Mauritanian President Mohamed Ould Ghazouani and the ...

BCD Energy provide a range of services for the domestic and commercial market. One half of BCD Energy specialise in engineering design and consultancy. The other half specialise in providing renewable energy solutions to both the domestic and commercial sector.

As provided by the 2014-2018 National Energy Policy, the Gambia's electricity objectives are to increase electricity generation, enhance electricity fuel diversity with an estimated 30% use of renewable energy for generation, promote private sector participation, and improve access to an affordable and reliable supply particularly for rural ...
