The PowerTitan 2.0 represents a seamless fusion of cutting-edge technologies in power electronics, electrochemistry, and grid support, positioning it as a formidable player in the utility-scale energy storage market. With an impressive battery cell capacity of 314Ah, it accommodates a Power Conversion System (PCS) within a compact container.

technology with advanced power electronics and grid support features, marking a significant leap forward in BESS solutions. This plug-and-play BESS uniquely pre-integrates all internal components-- including the batteries, string PCSs, BMS, thermal management, and fire suppression systems--within a 20-foot container for easy installation ...

The solution plays a vital role in supporting the smooth operation of new power systems. Notably, PowerTitan 2.0 operates with low noise levels below 75 dBA, utilizing carefully selected biodegradable or renewable transformer oil, refrigerants, and fire extinguishing agents, aligning with environmental sustainability.
