Where is the solar power plant located in Benin?

The government of Benin is inaugurating the Illoulofin photovoltaic solar power plant. The facility, located in the commune of Pobè, Plateau department, has a capacity of 25 MWp. Benin is inaugurating its first large-scale solar photovoltaic power plant. The installation, located in the locality of Illoulofin, was recently commissioned.

What is Benin's current energy situation?

This section provides information on Benin's current energy situation with energy demand-and-supply scenarios. According to the International Renewable Energy Agency (IRENA), 41% of Benin's population currently have access to electricity.

How much energy does Benin produce?

From 114 gigawatt hour (GWh) in 2010 to 1062.8 GWh in 2020, the energy output of self-producers and public power plants increased, with 810 GWh produced by public thermal power plants alone and 71.9 GWh by Benin's portion of Nagbeto's hydraulic production.

Where is Benin's new power plant located?

The installation, located in the locality of Illoulofin, was recently commissioned. The reception ceremony presided over by Benin's Minister of Energy Dona Jean-Claude Houssou took place on Tuesday 19 July 2022. It was attended by officials from the French Embassy in Benin, and the Electricity Regulatory Authority (ARE).

How can bioenergy contribute to the energy sector in Benin?

In addition, the Vossa hydroelectric power plant of 60.2 MW is to be built with an annual production capacity of 188.2 GWh. An additional hydroelectric plant is planned to be installed in Bèrou to increase the national electricity production in Benin. Bioenergy can also play a crucial role in the energy sector in Benin.

Does Benin have a green energy potential?

Benin has also joined this dynamic by considerably increasing its green energy production efforts in recent years. The country has a huge undeveloped renewable-energy (RE) potential that can contribute considerably to its national energy production capacity. This paper summarizes the current RE situation in Benin and examines its future prospects.

We observed that solar power electricity production increased considerably, from 495 MWh in 2014 to 5391 MWh in 2018. Meanwhile, only 4.8 million of inhabitants had access to electricity in 2017.

The Beninese government has announced to double the capacity of the Illoulofin solar PV plant located in the

Plateau Region of the country. Initially planned for a capacity of 25 MWp, the under-construction solar power plant will now have a ...

Toyota Tsusho Corporation has signed a public-private partnership (PPP) agreement with the new Sociétié nationale de production d'électricité (SBPE) to develop a 25MW solar power plant in Pobe Municipal Council in the south-eastern flank of the republic of Benin. The facility is the second phase of the Illoulofin photovoltaic solar power plant.

Construction launched on 12 November at the 25MWp Forsun Solar PV plant in Pobé, Benin. The project is the result of cooperation between the French Development Agency (AFD), the European Union and the Beninese government to invest almost 16 billion West African Francs (\$25.58 million) into building the solar plant.

Toyota Tsusho Corporation, a Japanese conglomerate, has sealed a deal with the Beninese Electricity Production Company to erect a 25 MW solar power plant in Benin's Pobé region. This venture represents the first ...

We observed that solar power electricity production increased considerably, from 495 MWh in 2014 to 5391 MWh in 2018. Meanwhile, only 4.8 million of inhabitants had access ...

To provide access to clean energy services to its communities, the government of Benin has recently inaugurated a 25-MW solar PV system. The solar power plant of Illoulofin is the first solar plant integrated into the grid with a generation capacity of 25 MW.

Key Figures & Findings: Benin has commenced construction of the 25 MW Forsun photovoltaic (PV) plant, enhancing the capacity of the Illoulofin solar power plant. The project, valued at \$25.8 million, is funded by the French Development Agency (AFD) and the European Union.

Illoulofin Solar Power Station, is a 50 megawatts (67,000 hp) solar power plant in Benin, whose first 25 MW was commissioned on 19 July 2022, and the next 25 MW is under construction and is expected to come online in 2025.

The idea is it should be a pilot for regulated off-grid electrification in Benin, part of a region that historically has failed to capture its huge renewable resources because of ...

Benin is inaugurating its first large-scale solar photovoltaic power plant. The installation, located in the locality of Illoulofin, was recently commissioned. The reception ceremony presided over by Benin's Minister of Energy Dona Jean-Claude Houssou took place on Tuesday 19 July 2022.
