

Benin caiso battery

Why does CAISO not include battery charging?

One quirk of CAISO's load reporting is that they do not include battery charging, which distorts the picture of total demand on the grid. To ameliorate this, we have added it back in the figure below, which dramatically alters the shape of the load curve for 2024.

Why are CAISO power plants still online?

But retirements have been delayed. Instead, at the urging of Gov. Gavin Newsom, CAISO President and CEO Elliot Mainzer, state lawmakers and energy regulators, those plants will remain online for at least the next few years due to grid reliability concerns.

Are batteries a major force impacting CAISO's grid operations?

Batteries have taken a huge leap forward in CAISO this spring, shifting from a noteworthy trend into a major force impacting operations of the grid. Battery storage has been a standout performer in California ISO this spring. After years of growth, batteries have reached a level of operations where they now play a newly impactful role on the grid.

Developers plan to add 6,813 MW of battery power storage capacity in CAISO's domain this year, dominated by four-hour lithium-ion resources, roughly double their additions in 2023, according to an analysis of ...
