

Berkeley energy com Georgia

Berkeley Electric Cooperative maintains a strong grassroots presence through its ACRE and COPA programs to express the interests of its members to government representatives. Find out more about how to EMPOWER YOURSELF and your cooperative.

This meeting focuses on technical exchanges, including student and faculty presentations, poster sessions, invited keynotes, and laboratory tours. The meeting represents a unique networking and educational opportunity for power and energy professionals in the Bay Area and beyond.

According to the Energy Information Agency, "Georgia's four existing nuclear reactor units accounted for 26% of the state's net electricity generation in 2016, coal accounted for 28%, natural gas accounted for 40%, and renewable energy, including hydroelectric power, contributed more than 6%."

Berkeley Energy is committed to ensuring that investments do not adversely impact the local community and the environment and have lasting E& S benefits. Integrating E& S in our business model allows us to adapt to a changing environment and society standards.

Berkeley Energy is an investment manager founded in 2007 to invest private equity into renewable energy infrastructure in developing markets. The firm has deep renewable energy and power engineering,...
