

Besa energy Cook Islands

Who imports the fuel in Cook Islands?

85% of the country's fuel and all of its jet fuel is imported by Pacific Energy. The Energy Act 1998 established an Energy Division within the Ministry of Works, Energy and Physical Planning (now Infrastructure Cook Islands) responsible for energy policy and electricity inspections.

Will the Cook Islands use renewable electricity?

The Cook Islands will be careful in its selection of renewable electricity options and will not entertain unproven or non-commercial technologies. The attached Summary Table provides some indicative and preliminary information on the types and costs of the renewable electricity technologies we are considering.

Can a partner help the Cook Islands achieve its targets?

The Cook Islands is looking for partners who can help achieve its targets through funding the conversion of one or more of the islands from diesel generation to renewable energy. We acknowledge the support we have already received from our partners.

How will new energy technologies affect the Cook Islands?

In future, new energy technologies such as marine energy may offer new opportunities for the Cook Islands to generate electricity from other renewable sources. Developments in energy storage or in energy efficiency may also further reduce the Cook Islands' reliance on diesel. The Cook Islands prefers to use proven and economic energy technologies.

Why is energy important in the Cook Islands?

Energy is a fundamental prerequisite to the sustainable socio-economic development of a nation. As such, the Cook Islands Government considers that environmental protection, energy security and economic growth are inseparable key pillars of our country's development.

Can solar power be used in the Cook Islands?

The Cook Islands has abundant solar radiation, which makes solar electricity PV an attractive option. On average, about 80 percent of households already use solar water heating, and we are committed to increasing the use of photovoltaics for electricity generation and to reduce reliance on diesel.

Education Commercial Services (ECS) are seeking to establish a Dynamic Purchasing System (DPS) for the provision of ethically and sustainably sourced Construction, Works and Professional Services from a wide range of suppliers who can make a positive impact on the environment and our communities whilst managing the increasing risk of modern ...

Systemic issues such as school funding, hit hard by the energy crisis and rising costs, are continuing to put pressure on schools and staff. Continued poor wellbeing among school staff is exacerbating the problems of teacher recruitment and retention, meaning that keeping teachers in schools and looking after their wellbeing and development is ...

Atiu. Rarotonga and Aitutaki are by far the most visited islands in the Cook Islands. The other islands don't even come close. But that's exactly why travellers do decide to explore the lesser-visited islands of the Cooks; to experience something more adventurous, less crowded and perhaps a little more authentic. A first go-to for such an occasion would be the ...

The Pacific Energy Group became established in the Cook Islands in 2010 thanks to the acquisition of the BP assets. Ever since, the Group has renewed its partnership with the power plant TAU and equipped itself with a new refueler to support the business growth. Optimization and quality of supply are also a priority.
