

When will 'Black Bess' project be completed in Italy?

The four sites in central-southern Italy are being called the 'Black BESS' project and will be completed by the first half of 2024. Alongside three other groups of projects, called Green, Blue and Yellow BESS, the project will contribute to Altea Green Power's 2GW BESS portfolio in Italy.

How long will Bess projects take in Italy?

By 2026, in Italy, we aim to reach 5.5GW by making available all our engineering know-how gained over the years, thus consolidating our role as a reference player". BESS projects in Italy are likely to have a 4-5 hour duration as most of their activity will be energy-intensive activities like load shifting or capacity market provision.

When will a Bess plant be built in Italy?

Between April and June 2023, we started the construction of new BESS plants in several Italian regions, with a total capacity of 1.6 GW expected by the end of 2024. Many of these plants are located on the sites of old thermal power plants, and this is a virtuous example of the circular economy. Nor does innovation stop here.

Is Altea a Bess company?

Altea describes itself as a developer and EPC (engineering, procurement and construction) firm and recently discussed a separate 2GW pipeline of BESS it was selling in Italy with (Premium access). The company is also developing BESS projects in the ERCOT market in the US state of Texas.

The four sites in central-southern Italy are being called the "Black BESS" project and will be completed by the first half of 2024. Alongside three other groups of projects, called Green, Blue and Yellow BESS, the project will contribute to Altea Green Power's 2GW BESS portfolio in Italy.

UK-based fund manager Glenmont Partners has partnered with Exus Renewables, a Spanish asset management company, to develop 800MW of battery energy storage system (BESS) projects in Italy. The collaboration will ...

Learn how Enel transforms renewable energy in Italy with advanced BESS storage systems, providing stability and flexibility. Italy, which has always been a pioneer in renewable energy, continues to innovate with BESS (Battery Energy Storage Systems).

The newly formed JV aims to develop over 1 GW of Battery Energy Storage System ("BESS") projects, establishing Cubico's presence in Italy's rapidly growing battery storage market. The JV will encompass four projects in its initial phase, incorporating two contributions from Cubico with a combined capacity exceeding 150 MW.

Therefore, battery energy storage systems (BESS) are needed in Italy. The Italian market for BESS is growing rapidly and currently amounts to 2.3 GW but it almost exclusively consists of residential scale systems, associated with small scale solar plants, having an average capacity of less than 20 kWh.

L'Italia, da sempre Paese precursore nelle energie rinnovabili, continua a innovare con i sistemi di accumulo energetico BESS. Enel guida questa rivoluzione con progetti avanzati sia a livello nazionale che internazionale, contribuendo alla stabilizzazione delle reti e alla decarbonizzazione.

Matrix Renewables, a TPG Rise-backed global renewable energy platform, has started a partnership with Gravel A through a proprietary development service agreement (DSA) for the development of up to 1.5 GW of standalone ...

The DSA consists of a series of standalone BESS projects with different sizes and geographies, which Gravel A will develop exclusively for Matrix until they reach Ready-to-Build status. This partnership is of high strategic relevance to help the Parties reach their ambitious growth plans in Italy and it highlights Matrix as one of the first ...
