Burundi is positioned to lead the region in solar energy development thanks to its abundant sunshine and untapped solar potential; the nation currently has roughly 17 MW of installed solar PV capacity.

With a capacity of 7.5 MWp, the Mubuga solar power plant provides up to 10% of Burundi's electricity, according to Gigawatt Global. The Dutch IPP also estimates that the plant is capable of supplying 87,600 Burundians. It also represents the largest international private investment in Burundi's electricity sector in nearly 30 years.

After six years of planning and construction, the 7.5MW Mubuga Solar Power Plant in Burundi, the first of its kind in the East African country has started commercial operations, which makes it the country's first substantial energy generation project to go online in over three decades.
