

Bold energy Tuvalu

Who is bold Energy Limited?

Bold Energy Limited (BEL) is an energy-focused manufacturing, trading and consultancy company incorporated in Uganda to stimulate renewable energy and energy efficient technologies for small and medium enterprises (SMEs), government agencies and households.

What are the characteristics of Tuvalu's energy consumption?

Analysis of Tuvalu's energy consumption reveals the following characteristics: o Tuvalu's economy is almost totally dependant on oil. Only around 18% comes from local biomass resources, which is not accounted for in official statistics and is not the object of any active policy.

Why is Tuvalu A good place to live?

Tomorrow's economy stems from today's environment. Investing in the quality of soil, avoiding water pollution, protecting natural resources especially energy sources as well as fighting against climate change will largely determine the success of Tuvalu's development for this new century.

What is the Tuvalu solar power project?

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti 's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

How does Tuvalu's environment affect development & economy?

Tuvalu's environment is under pressure: sea-water rise contaminating the soil with salt, direct impact on waste and sewage systems from rising human density contributing to further damage. The 1987 UN Brundlandt report has definitely shown the existing link between environment/ecology and development /economy.

Renewable energy in Tuvalu is a growing sector of the country's energy supply. Tuvalu has committed to sourcing 100% of its electricity from renewable energy. This is considered possible because of the small size of the population of Tuvalu and its abundant solar energy resources due to its tropical location.

Tuvalu stands as a beacon of resilience in the face of climate and economic vulnerabilities and despite its status as one of the smallest atoll nations, Tuvalu is taking significant strides to lead the region in sustainable energy endeavours.

We offer energy-efficient solutions to homes, businesses, institutions and farms. We promote the use of clean cooking technologies and consult in renewable energy. Our products are tailored to solar technologies, clean cooking stoves and training programmes.
