No wonder sailors call Bouvet the world's most remote island; no wonder writers and science fiction movie-makers keep using it in their storylines. Other stories from the AGU meeting you might like:

If you want to get away to get away from it all, forget the Caribbean, the South Pacific, or even the South Pole. We've got a place that beats them all: Bouvet Island, a small outcropping of rock and ice in the Southern Ocean. The nearest land is more than a thousand miles away, making Bouvet the most remote island on the planet. A French sailor named ...
