

What are the solar PV module certification requirements in Brazil?

In this article we have a closer look at the solar PV module certification requirements in Brazil, which are commonly known and summarized as INMETRO. If you're a PV manufacturer looking to gain access to the Brazilian solar energy market you'll need INMETRO certification. Are you looking to obtain INMETRO certification?

Does Brazil have solar panels?

Brazil is more advanced than most countries around the globe when it comes to clean energy, but the solar power presence is yet to be expanded in the energy matrix. This article outlines the certification process of solar panels to Brazil.

Can international solar companies participate in the Brazilian PV market?

However, even though the organization of INMETRO certification has been simplified, there are still more hurdles for international solar companies that want to participate in the Brazilian PV market. PV modules can only be imported by solar companies that are legally registered and operating in Brazil.

Can solar panels be imported from Brazil?

PV modules can only be imported by solar companies that are legally registered and operating in Brazil. That said, the INMETRO certification mark is only granted in the name of the local representative office of the manufacturer in Brazil and not for example of its headquarters abroad.

Is solar energy the third largest source of Brazilian electricity?

Solar energy reached 16.4 (GW) of installed capacity and became the third largest source of the Brazilian electricity matrix, according to a survey by the Brazilian Association of Photovoltaic Solar Energy (ABSOLAR).

How much solar energy is produced in Brazil?

In Brazil, the capacity to generate renewable energy corresponds to 84%, higher than the world average of 38%. Also, according to ABSOLAR, 70% of the solar energy produced here comes from small systems installed on the roofs of homes, businesses and rural properties.

According to Rodrigo Sauer - the president of the Brazilian solar association, ABSolar - the new rules will ensure legal certainty by maintaining the net metering scheme until 2045.

As Brazilian firms slow the pace of panel and module imports and dial up use of domestically-made components, the make up of solar systems elsewhere in South America will shift to match those...
