Honeywell and Leclanché; spearhead renewable energy initiatives in the Caribbean, integrating battery storage with solar PV to drive islands like the US Virgin Islands and St Kitts & Nevis toward 30% or more renewable energy consumption.

French battery company Saft will lead a consortium building a photovoltaic (PV) power plant combined with a lithium-ion (Li-ion) battery energy storage system on the island of La Réunion,...

In July, ministers passed secondary legislation that will allow battery storage to bypass the Nationally Significant Infrastructure Project (NSIP) process in Britain. This means storage projects above 50MW in England and 350MW in Wales to proceed without approval through the national planning regime.

Earlier this year, the city-state launched the region's largest battery energy storage system (BESS). Construction of the 285MWh giant container-like battery system was built in just six months, becoming the fastest BESS of its size in the world to be completed.

Earlier this year, the city-state launched the region's largest battery energy storage system (BESS). Construction of the 285MWh giant container-like battery system was built in just six months, becoming the fastest ...

The AES-Kekaha Solar PV Park - Battery Energy Storage System is being developed by AES Distributed Energy. The project is owned by AES Distributed Energy (100%), a subsidiary of The AES. The key applications of the project are renewables capacity firming, renewables energy time shift and resiliency.
