

British Virgin Islands solar irrigation system price

Are You covered if you buy a solar irrigation pump?

You are covered if you buy today or if you have one of our current range of solar irrigation pumps. Minimise downtime and fix your pump on your farm. Every pump comes with a free spares and tools kit and our support videos guide you to the solution. It's time to take back control and irrigate when you need.

How does a solar powered irrigation system work?

The flow rate and distance you can pump water will decrease with greater lift as more energy is required to move the water vertically. You can approximate your water needs and required flow rate using the equation below: Solar powered irrigation is now an option no matter where you are located.

Should you switch to solar irrigation?

Manual irrigation is labour intensive and, as a result, the size of land you can cultivate is limited. Switching to solar can give you hours back in your day as the pump will move water for you - either directly to the crops or to a tank for gravity irrigation later. From electric pumps to solar pumps

Below is a guest blog shared from Cedar Hedge Farm in Ontario, Canada, looking at how they managed the unusually dry weather in 2021. These updates were written by Farmer Chris in July 2021 and January 2022. From the different solar pumps they tried, to the impacts of irrigation on crop growth, this is a fantastic read into how solar powered irrigation ...
