Will solar power boost Burkina Faso's energy supply?

Hussain AlNowais, chairman of the developer, quoted in a press release it issued this week, said: "We support Burkina Faso's drive to turn to solar as a vital measure to boost the energy supply and to reduce the country's reliance on the importation of fossil fuels for power generation."

What makes Lina batteries unique?

Materials are abundant and thanks to our patented design, our batteries are ideal for mass manufacture. LiNa's battery cells are the building block of LiNa Energy's battery platform. The cells utilise proven Sodium-Metal-Chloride chemistry in a breakthrough planar design made possible by our ultra-thin solid ceramic electrolyte.

Which country is developing a solar field in Burkina Faso?

The Zina solar field, which is being developed by Amea Power, is being financed by the World Bank's private sector arm and will be constructed in Mouhoun province. The International Renewable Energy Agency estimated Burkina Faso had 62 MW of grid-connected solar at the end of 2021.

How do Lina batteries work?

LiNa batteries are constructed without lithium or cobalt. On charge, sodium ions from the sodium-metal-chloride cathode are reduced to sodium metal and travel through the solid-state ceramic electrolyte to the anode compartment, forming an interconnected backbone conductor.

According to the Burkina Faso government's roadmap, by deploying 60-70 MW (160-220 MWh) of independent battery electricity storage solutions (i-BESS), the energy sector could potentially save between 800 million and 1.8 billion CFA francs (EUR1.2 million to EUR2.7 million) per year, while reducing CO2 emissions.

Our latest battery energy storage system just got a major upgrade. The LiNa Engineers have slashed the size by 50% while maintaining the same 10kWh capacity. As solar energy deployment expands globally, we're committed to solving the storage challenge.

It outlines how Burkina Faso could reduce its reliance on fossil fuels and energy imports by taking advantage of its fast-growing solar power sector. The report found that by deploying 60-70MW (160-220MWh) of independent battery energy storage solutions (i-BESS) the energy sector could potentially save between 800 million and 1.8 billion FCFA ...

5 ???&#0183; Burkina Faso AMEA and Sinohydro bring forgotten Zina solar plant back to life Having already bought a 90% stake in the project from its original developer Cose banada's Windiga, UAE-based AMEA Power has awarded the construction of this 26.6MW solar power plant to China's Sinohydro, which

## Burkina Faso line battery

has taken over from France's Bouygues.

Comau has joined forces with LiNa to design an innovative and scalable manufacturing solution for solid-state sodium-metal-chloride battery cells. Through simultaneous engineering, the team has finalized a concept ...

Comau has joined forces with LiNa to design an innovative and scalable manufacturing solution for solid-state sodium-metal-chloride battery cells. Through simultaneous engineering, the team has finalized a concept design, allowing LiNa, a developer of low-cost solid-state sodium battery technologies, to automate their battery production process.

The Zina Solar Power Station is a 26.6 megawatts solar power plant in Burkina Faso. The power station is owned and was developed by a consortium comprising Amea Power, an independent power producer (IPP), based in the United Arab Emirates ...

The Zina Solar Power Station is a 26.6 megawatts solar power plant in Burkina Faso. The power station is owned and was developed by a consortium comprising Amea Power, an independent power producer (IPP), based in the United Arab Emirates and Windiga Energy, an IPP based in Canada. The energy off-taker for this solar farm is Soci t  Nationale d' lectricit  du Burkina Faso (SONABEL), the Burkinabe national electricity utility company. A 25-year power purchase agreement

Burkina Faso could drastically increase the use of renewable energy in its power mix by developing battery storage solutions through public private partnerships, according to a roadmap supported by IFC.

5 ???&#0183; Burkina Faso AMEA and Sinohydro bring forgotten Zina solar plant back to life Having already bought a 90% stake in the project from its original developer Cose banada"s Windiga, ...

Our sodium-metal-chloride battery is built around proven technology based on 1980s sodium chemistry, with modern materials science and advancements in fuel cell ceramics. As well as improving standards in safety, performance and sustainability, we can commercialise faster by reducing lab development time and lowering the cost of deployment.
