In a significant step towards enhancing electricity supply and sustainable development, Burkina Faso signs an agreement for a 50 MWp solar power plant in Komsilga. The initiative, led by the Minister of Energy and Energie Plus, aims to fortify renewable energy contributions, fostering economic growth and improved access to electricity.

This write-up examines Burkina Faso's promising solar energy future in 2024. 90 MW of solar PV capacity was installed nationwide. West African nation Burkina Faso has a significant geographic advantage when it comes to solar power.

Burkina Faso solar ecommerce

We are a Burkinabe-owned solar energy company. We meet with a client who wants to contribute to reversing climate change by consuming solar-based energy in his home or business. We design and propose a solution to meet the client's energy requirements. After the client approves the quotation, we install the system.

The aim is to increase access to clean energy by improving the financial viability of, and promoting large-scale commercial investment in, solar photovoltaic minigrids in Burkina Faso. The project will also support the government's COVID-19 recovery efforts and strengthen the resilience of vulnerable communities by supporting livelihoods and ...
