Can a new adhesive film display media advertising on solar panels?

Swiss startup PV-Print has developed a new adhesive film that can display media advertising on solar panels. It said that its new "PVP-foil" product makes building-integrated photovoltaics (BIPV) more aesthetically appealing. It can also create additional revenue streams for PV owner, by using its PV panels for advertisements.

What are solar powered CCTV cameras?

Sunstore Solar UK Solar powered CCTV cameras are the perfect solution for maintaining security in remote or challenging environments. They can work with no grid connection, are entirely self-sufficient and can generate enough power to work almost indefinitely. Solar powered CCTV cameras are ideal for:

Can a new adhesive film make solar panels more aesthetically appealing?

A Swiss company has developed adhesive film that can be applied on solar panels to make them more aesthetically appealing. The film reduces electricity production by between 10% and 30%, but income from advertising could offset such losses. Swiss startup PV-Print has developed a new adhesive film that can display media advertising on solar panels.

Can solar panels be used as advertising billboards?

It replicates high-definition images that can help to improve the aesthetics of solar arrays or turn PV facades into advertising billboards. Italian startup Sunspeker has developed a customizable, fully recyclable sticker to wrap photovoltaic panels.

Do solar powered CCTV cameras have remote access?

The solar powered CCTV camera system from Sunstore answers all those questions. As an added benefit, some solar powered CCTV cameras also have remote access if there is a WiFi connection or can store many hours of footage for later inspection. Not sure what you need?
